COMPACT CONSTRUCTION EQUIPMENT SPECIALISTS

YOU'VE GOT A JOB TO DO. YOU NEED RESULTS. WE'RE HERE TO HELP.

ASV Sales & Service is one of Australia's premier construction equipment suppliers. From the industry-leading range of ASV Posi-Track™ Compact Track Loaders, to skid steers, excavators, telehandlers, wheel loaders, forestry equipment and much more, ASV Sales & Service has the products, and the support, to keep you working on any job site.

Equipment Sales

At ASV Sales & Service, we know construction equipment. You can count on our dedicated and knowledgeable team of product experts to take the time to understand and satisfy your equipment needs by recommending the right solution for the job. If you're looking for a high quality machine you can rely on to get the job done, trust ASV Sales & Service.

Rentals

When you want a high-performance machine with reliability that you can trust, but you need the flexibility of hiring, ASV Sales & Service has you covered. Our fleet is diverse, offering a machine to suit virtually any requirement. Furthermore, because our rental fleet is maintained by factory-trained technicians, you can be confident that you'll not only be getting the best gear on the market, but that it's also going to work as hard as you do.

Aftermarket Support

We're in business to help keep you and your machine working. With an over-the-counter fill rate on spare parts averaging more than 90%, you can be sure that when you buy a machine from ASV Sales & Service, you'll be looked after throughout the mchine's entire lifetime. Every service job is as important to us as it is to you, and with a dedicated team of construction equipment technicians, we have ample resources to look after any of your machine repairs or servicing requirements quickly and efficiently.

PRODUCT RANGE:

ASV COMPACT TRACK LOADERS
- ASV Posi-Track™ 25hp - 120hp range

JCB CONSTRUCTION EQUIPMENT
- Mini / Large Excavators 800kg - 40t
- Telehandlers 4m - 20m
- Wheel Loaders / Front End Loaders
- Compact Track / Skid Steer Loaders
- Industrial Forklifts
- Fastrac Tractors
- Generators 1kVa - 2250kVa

EUROCOMACH MINI EXCAVATORS
- Eurocomach Mini Excavators 1t - 9t

MECALAC / TEREX SITE DUMPERS
- Power Swivel & Power Tip 3.5t - 9t

FECON VEGETATION MANAGEMENT
- Forestry Tractors 150hp - 600hp
- Mulcher Attachments for SSL / EXC
- Tree Shears for SSL / EXC
- Stumpex® Stump Grinders for SSL / EXC
- Industrial Brushcutters for SSL

USED MACHINES
- Track Loaders
- Skid Steers
- Site Dumpers
- Mini Excavators
- Large Excavators
- Forestry Equipment

ATTACHMENTS
- Various Buckets
- Road Widener
- Auger Drives
- Trenchers
- Forestry
- Bucket Brooms
- Dozer Blades
- Rotary Tillers
- Pallet Forks

NEED A MACHINE THAT CONFORMS TO CURRENT WHS OR MINING REGULATIONS? WE CAN HELP.

We understand that local WHS requirements can change from site to site, but you can be confident that a machine delivered by ASV Sales & Service will fully-comply with your needs.

In addition, our expert team of service technicians can tailor any of our machines to meet all regional and mine specification requirements. Plus, many of our rental machines have basic mine kits already installed, so if you need to get to work in the mines, we've got you covered!

COMPACT TRACK LOADERS

THE HOME OF ASV POSI-TRACK™ IN AUSTRALIA.

Efficient. Comfortable. Durable. That's the Posi-Track™ difference.

With exceptional versatility, the Compact Track Loader is at home in a multitude of applications - including landscaping, ground preparation, forestry, house building and road maintenance.

What this means for you:

- The industry's original Posi-Track™ suspension undercarriage delivers unmatched traction, stability and ride comfort, while eliminating damaging shock loads and improving machine component life.
- Specially-developed crawler tracks provide go-anywhere performance and unmatched durability.
- Multi-level suspension system provides excellent ground contact and a smooth ride at high travel speeds and/or on uneven terrain, resulting in greater operator comfort and increased productivity.
- Best-in-class ground clearance for excellent off-road ability.
- Choice of cab: open / air conditioned / MAX-Series (selected models below).
- Customise your machine and its attachments to suit your needs.

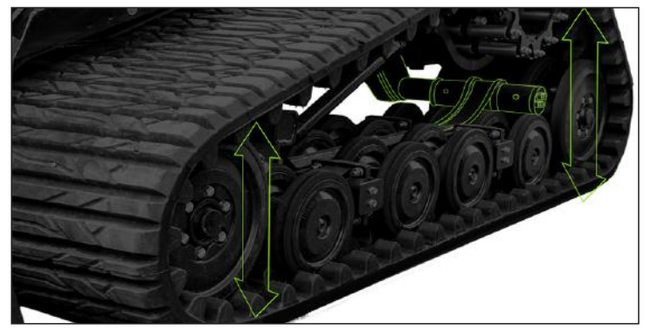
WHAT MAKES POSI-TRACK™ SO SPECIAL?

ASV pioneered the Compact Track Loader industry, and has been perfecting its legendary Posi-Track undercarriage for more than 30 years. Experience improved traction and flotation, unmatched ride comfort, and superior durability compared to other CTLs.

- An open-rail, suspension-type undercarriage, using industrial-strength rubber components = minimal wear and tear.
- Track drive system uses elevated roller sprockets with replaceable hardened steel sleeves, and a low friction drive between track lugs and sleeves = minimal impact on tracks and greater longevity of all components.
- Two torsion axles between the undercarriage and chassis deliver unmatched suspension and operator comfort.
- A higher ground clearance means you can work more productively in a wider range of ground conditions.

...There's only one Posi-Track™



CONSTRUCTION EQUIPMENT

WORLD-RENOWNED FOR EXCELLENCE.

Quality and durability engineered into every machine.

JCB's range of world-class machinery includes backhoe loaders, hydraulic excavators, mini excavators, skid steers, compact track loaders, telehandlers, Fastrac tractors, rough terrain forklifts and wheeled loaders.

JCB equipment is utilised across many industries in every corner of the world, including construction, agriculture, civil works, defence, rental, government, mining, recycling and waste management.

What this means for you:

- Choose from a wide range of world-renowned construction, earthmoving and materials handling machines.
- Receive the operational, sales, service, parts and rentals support that only JCB together with ASV Sales & Service can deliver.
- Throughout JCB's history, they have always invested heavily in research and development, keeping JCB at the cutting edge of innovation.
- Industry-leading finance offers help you make the smart choice to invest in a JCB without being hurt by high interest rates.

MINI EXCAVATORS

MADE IN ITALY

THE NEW BENCHMARK IN EXCAVATORS.

The next generation of smart, value-for-money excavators.

Italy is well known for its automotive excellence, and this is also evident in Italian earthmoving machinery. 'Only the best will do' is the feeling you get when operating Eurocomach excavators.

Operator comfort is high on the priority list when designing and producing Eurocomach Mini Excavators; the ergonomically designed cabins and high quality seats provide an environment that any sized operator will appreciate. The air conditioning system is extremely efficient with multiple vents placed throughout the cabin, ensuring a comfortable work environment even on hot summer days. Class leading serviceability is standard across the range, and smart design features such as tilt-up cabins and automatic fuel fill systems are standard on some models.

Every machine in the range is designed around a true zero tail swing concept, ensuring ease of operation, even in tight situations. Despite the compact design, the machines are impressively stable and feel extremely sure-footed on all types of terrain, even over the side. Eurocomach machines also provide impressive hydraulic performance across all sizes, with an optimised hydraulic circuit engineered for speed, precision, smooth multi-function, and best-in-class flows; ensuring maximum productivity for any attachment.

FECON FORESTRY

LET'S GET SOMETHING CLEAR.

For more than 20 years, Fecon has built a reputation of designing, engineering and manufacturing some of the most durable forestry and vegetation management attachments in the world.

Fecon's no-compromise approach extends into each of their product lines. When you experience the Fecon difference, you'll know it.

Fecon, in partnership with ASV Sales & Service, equips customers Australia-wide with heavy duty equipment and industry-leading after sales support. By providing the highest value products and superior service, Fecon and ASV Sales & Service together forge lasting relationships with every customer.

While Fecon is proud to be known and recognised for the world famous Bull Hog - the industry-leading forestry mulching head - the story doesn't stop there. Fecon manufactures a broad line of durable, purpose-built products spanning an impressive range of forestry and vegetation management applications.

Product Range Overview - Fecon Forestry Equipment

FTX Forestry Tractors: Fecon's reputation for durability, reliability, versatility and operator support is recognised across our line of tracked carriers, from the 150HP FTX150, up to the 600HP FTX600. Offering a versatile and efficient mix of power, control and speed, these versatile track loader-style machines deliver supreme results and unmatched customer satisfaction.

Bull Hog Mulchers: Attached to almost any excavator, skid steer or track loader, Bull Hog forestry mulchers are perfect for clearing dense trees and brush along roadsides, ravines, creeks, riverbanks, and places that could otherwise be difficult to reach - and the final mulch quality is simply unmatched. Available with a wide variety of tool configurations to ensure you receive maximum satisfaction with component longevity and sharpness, end product consistency, and lower operational costs overall.

Stump Grinders: Fecon offers Stumpex stump grinders to suit skid steers, posi-tracks and excavators. The Stumpex utilises a low RPM functionality that provides safer and more efficient operation than many alternative stumpers. Fecon's Stumpex is receiving extensive acclaim in Australia for its ability to chew through stubborn native timber with impressive ease.

Tree Shears: Able to be mounted on excavators, skid steers and tracked loaders, Fecon Tree Shears require only as little as 75 LPM of low flow hydraulics. They are ideal for reaching up and down slopes and areas that are otherwise inaccessible, to clear trees up to 500mm in diameter.

SITE DUMP TRUCKS

A GLOBAL ICON FOR A REASON.

With more than 60 years of dumper heritage, the Mecalac (formerly Terex) range of site dumpers are rugged and robust machines capable of operating on the toughest of job sites. Previously available as Terex dumpers, Mecalac took over the range in 2018.

Mecalac Site Dumpers deliver exceptional off-road performance, thanks to high torque engines and efficient transmission systems that smoothly deliver power to all wheels, providing excellent traction and stability. These machines offer incredible power and efficiency, and are the perfect hauling tool for any tight access construction site.

Every Mecalac Site Dumper is built “Rental Tough”, with heavy duty skip bin construction, quality components, and a robust build quality that ensures it will stand the test of time. And as you’d expect from a Terex product, servicing couldn’t be simpler. With an easy to remove floor plate, large opening service doors and a reduction in traditional wear parts, maintenance time and expenses are greatly minimised.

Choosing a Mecalac Site Dumper means choosing to work differently. It is deciding to adopt innovative technologies for the efficiency of work sites. It is the assurance of more comfort, safety for the operators, efficiency on the work site, and a better return on investment. It is ultimately the choice to deliver more profitability and sustainability to your business.

ATTACHMENTS

BEST BRANDS. LOWEST PRICES. FRIENDLY SERVICE.

In addition to our extensive range of construction machines, ASV Sales & Service offers the best attachments for your Posi-Track, skid steer, mini excavator or PTO machine.

Our range includes many types of excavator and CTL / SSL buckets, rippers, dozer blades, tilt and quick hitches, brooms, road wideners and profilers, pallet forks, ramps, brushcutters, mulchers, tree shears, stump grinders, and many more.

Product Range Overview - Attachments

ASV Sales & Service are official dealers / resellers / distributors for the following brands of attachments, and can offer most attachments to you as either standalone products, or as part of packages with your next new or used machine purchase:

Fecon are world-renowned for producing the toughest, most durable and remarkably affordable vegetation management attachments, including mulchers, tree shears, stump grinders and compact forestry tractors.

Road Widener LLC manufactures unique road shouldering attachments designed to significantly decrease your operating costs whilst delivering excellent performance, productivity and efficiency.

Norm Engineering offers a diverse range of attachments for excavators, skid steers and Posi-Tracks, including but not limited to buckets, rippers, angle / tilt dozer blades, forks, and tilt hitch attachments.

Digga offers a wide variety of earthmoving equipment attachments, including but not limited to auger drives, slashers, rotary hoes, trenchers, buckets, bucket brooms, and pallet forks.

Davco industrial strength rotary Brush Cutters are designed, engineered and built to be the leader in industrial strength and quality, achieving low operating cost and minimal maintenance.

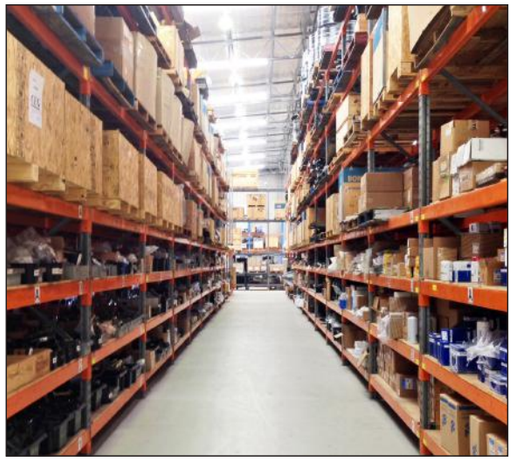
Schibeci is an Australian manufacturer of high quality road milling and profiling equipment, including the best-in-class ST1000 attachment for use with skid steers and compact track loaders.

SERVICE, PARTS & SUPPORT

ASV SALES & SERVICE PROVIDES THE BEST PARTS AND SERVICE SUPPORT IN THE BUSINESS.

Trust ASV Sales & Service's factory trained expert parts and service technicians to get the most out of your machine. We offer full maintenance, parts and service – with complete field service capability at each of our locations, our team of fully-qualified plant and diesel mechanics provide service on any make or model of earthmoving equipment.

Rest assured, when you buy a machine from ASV Sales & Service, we have the resources to back it up!



GENUINE FACTORY PARTS HELP YOU GET THE MOST FROM YOUR EQUIPMENT INVESTMENT.

As the National distributor for ASV Posi-Track Compact Track Loaders, Eurocomach Mini Excavators and Fecon vegetation management equipment, we have the most comprehensive supply of factory spares in the compact equipment industry.

Our warehouse consistently maintains over 75,000 parts on the shelf – or around $6M in parts inventory – and we are proud to provide an average of 96% fill rate on spares over the counter. That means that whether it's a bolt, filter, track or an engine, we are likely to have it in stock.

Why take a chance with aftermarket parts? Genuine ASV, JCB, Terex, Fecon, Eurocomach and Road Widener parts are specifically engineered to help you get the most out of your machine for minimal expense. We also stock or can order in many parts for other brands of machinery and attachments. So if you're looking for a genuine replacement part for your machine, we've got you covered.

With daily express trucks running between our primary and satellite locations throughout Australia, you can be confident that you'll receive the best aftermarket service and support in the industry.

Put simply: we won't let you down.
